

1st Symposium on Theranostics

Cracow, 9-11 October 2021

Dear Colleagues,

on behalf of prof. Paweł Moskal and prof. Ewa Stępień, we are pleased to invite you to the scientific conference "1st Symposium on Theranostics". The conference will be held stationary and remote participation will be also possible.

Symposium will take place at the newly established "Theranostics Center" located in Kopernika 40 St. in Cracow. Theranostics Center is the headquarter of medical diagnostics laboratories and centre of the Jagiellonian Positron Emission Tomography research facility for J-PET scanner with a field of view on the patient's entire body.

The conference will bring together medical physics specialists, medical doctors and scientists devoted to the development of medical imaging, medical diagnostic and treatment methods. The main purpose of the conference is to exchange knowledge and experience of the attendees from various fields of medical physics, radiotherapy, medical imaging, public health, biotechnology and materials science.

More information is available on the symposium website:
